

NOVALDO PUTRA NUGRAHA

Information Systems Student — Universitas Pembangunan Nasional "Veteran" Yogyakarta
+62 812-3824-5844 | LinkedIn: Novaldo Putra Nugraha | GitHub: github.com/valtzzy

SUMMARY

Information Systems student with hands-on backend development experience leading a multidisciplinary team on an enterprise-scale Dealer Management System. Strong foundation in relational databases, MVC architecture, API design, and role-based access control. Comfortable working across the full development lifecycle from schema design to deployment and quick to pick up new languages and frameworks, currently strengthening Go for backend and distributed systems work.

EDUCATION

Universitas Pembangunan Nasional "Veteran" Yogyakarta

Bachelor of Information Systems - GPA 3.78 / 4.00

TECHNICAL SKILLS

- **Languages:** JavaScript, PHP (Native, OOP/MVC), SQL
- **Databases:** MySQL, PDO, ER Diagram (ERD) design, database restructuring & migration
- **Backend:** REST API development, authentication & authorization systems, role-based access control, custom MVC architecture
- **Tools & Infra:** Git, Vercel, Apache/Nginx, Cloudinary, DomPDF
- **Currently learning:** Go (Golang) for high-volume distributed backend services
- **Frameworks:** TOGAF ADM, BPMN, ITIL, Scrum/Agile (from coursework and project simulations)

PROJECT EXPERIENCE

Dealer Management Information System (DMIS) | Backend Team Lead

Enterprise web-based system for vehicle procurement, inventory, sales transactions, cash payments, vehicle delivery, workshop services, and role-based user management.

- Led backend development for a multidisciplinary team, owning database schema design, backend architecture, and API development.
- Designed and implemented the authentication and authorization system, including role-based access control across multiple user types.
- Managed database migrations and coordinated backend integration across the team.
- **Tech stack:** PHP 8.0+ (Native, custom MVC), MySQL/Cloud DB via PDO, Cloudinary, DomPDF, Vercel deployment, Git.

ORGANIZATIONAL & MENTORSHIP EXPERIENCE

Backend Mentor | CODE124

- Guided and evaluated mentees' progress from foundational to advanced backend development concepts.
- Provided direct troubleshooting support for technical issues, including resolving version control problems (e.g., Git push errors).
- Designed simplified backend learning modules to accelerate onboarding for new members.

Database Development Team | HIMASISFO

- Collaborated on a database restructuring project to integrate the internal "Behind The Web" system with HIMASISFO's main organizational website.
- Designed the data architecture through Entity-Relationship Diagram (ERD) mapping to ensure data integrity and query efficiency.
- Contributed to technical discussions to determine data infrastructure solutions suited to organizational scale.

ADDITIONAL EXPERIENCE

- Participant, Hackathon Digital Cooperatives Expo 2026 — contributed to ideation across four strategic pillars in a 3-person team.
- Team member preparing for GEMASTIK, Software Development Division (Divisi VIII).
